

GET SOFT WATER THE MORE EFFICIENT WAY.

SOFTMAX™

SOFT WATER MEANS MORE SATISFACTION

Our superior water softener eliminates hardness and iron/manganese, while improving your home's water efficiency by up to 40%. Soft water means cleaner laundry, more cleaning power from household soaps, less cleaning and a cleaner conscience.

- Spot-free dishes
- Easier cleaning ability
- Cleaner laundry
- Softer skin
- Less soap and cleaning products can be used
- Better looking faucets and fixtures with no scale buildup
- Longer lasting appliances
- Improve energy efficiency

WATER  **TECH**

watertech.com

STANDS UP TO HARD WATER AND HIGH EXPECTATIONS.

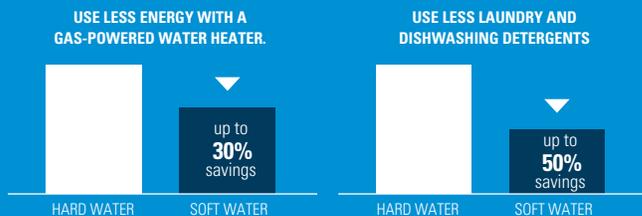

Our premium water softener features the industry's best components, giving you long-lasting performance year after year. Our SoftMAX models can meet any of your softening needs.

Environmentally friendly

The SoftMAX is fully-automated and measures exactly how much water is flowing through the system, regenerating only when needed. This provides a water efficiency improvement of more than 40% over industry standard softeners. With low, safe energy requirements of only 12-VAC, using less than \$2 per year of electricity, the SoftMAX is not only efficient, but a great cost-effective option for your home.

Cost effective

SoftMAX is proven to save you money by improving hot water heater efficiency by up to 30%. You can also cut down on soap and cleaning supply use by up to 50%. It also protects the life of your dishwasher, coffee maker and other appliances that use water.

SYSTEM FEATURES

- Fully-automated electronic metered control valve that is 40% more water efficient than the competition.
- Whole-house solution engineered with fewer moving parts for less maintenance.
- Anticipates water usage to ensure you have great water whenever you need it.
- User-friendly programming and intuitive LCD display.
- Advanced programming and service diagnostic features built in.
- Integrated PC chip with Ultra-High-Efficiency (UHE) programming for maximum salt and water conservation.
- High quality 8% cross-link softening resin.
- Low energy requirements of only 12-VAC, which means typical annual electricity costs of less than \$2 per year.
- Available in a variety of sizes and configurations to meet specific needs.
- Built to last with commercial-grade, corrosion-resistant components.
- Components certified to NSF/ANSI Standards 44 and/or 61.

Great value

Commercial-grade components provide long-lasting durability, while the fully-programmable valve lets you adjust the system to meet your specific water softening needs. The SoftMAX fits your life and your budget.

Impressive soft water

The reliable SoftMAX with high-quality softening resin ensures all the benefits of soft water, including spot-free dishes, cleaner laundry, softer skin, better performing water fixtures and longer-lasting appliances.

HOW IT WORKS

- 1 Untreated water flows through water softening resins.
- 2 Resins soften water by reducing calcium and magnesium in water.
- 3 Soft water enters your home, providing cleaner laundry, softer skin, easier cleaning, as well as soap, energy, and appliance savings.
- 4 The system uses a salt (brine) solution to clean and recharge the resin, while releasing hardness down the drain.

Model	Max Recommended Flow Rate (gpm)	Continuous Flow Rate (gpm) @ 15 PSID	Peak Flow Rate (gpm) @ 25 PSID	Maximum Flow to Drain (gpm)	Resin Tank Size	Total System Height (inches)	Brine Tank Size (L)x(W) (inches)
