

PREVENT SCALE. PROTECT MOTHER EARTH.

SALTFREEMAX™

The SaltfreeMAX Water Conditioner provides whole-house prevention of scale buildup and stops hard water scale from forming without salt, electricity or wasted water. It also protects your plumbing and household appliances from problematic scale buildup for a longer life span. Lessen the buildup and lessen your impact.

SALTFREEMAX™

ELIMINATING SCALE JUST GOT EASIER AND MORE ENVIRONMENTALLY FRIENDLY

Prevents Hard Water Scaling

Reduce scale buildup by up to 95% (when compared to no treatment at all). Protect the life of your water appliances, including ice makers, dishwashers, coffee makers and more, by preventing hard water scale buildup.

Removes Existing Scale Buildup

If scaling has already formed in pipes or water appliances, the SaltfreeMAX will also help de-scale existing buildup, improving the water flowing through your home and prolonging the lifespan of appliances.

No Slippery Feel

The advanced technology of the SaltfreeMAX does not leave behind the slippery feeling on skin that often occurs with a typical water softener.

Extremely Environmentally Friendly

The SaltfreeMAX uses no electricity, no chemical additives and wastes no water. Our simple, straightforward system operates with an absolute minimal environmental footprint.

Cost Effective

With no ongoing salt or additives to purchase, the SaltfreeMAX provides total scale protection 24/7.

Virtually Maintenance Free

With no electronics, no moving parts and no salt to replace, the SaltfreeMAX operates efficiently and accurately day after day with virtually nothing to worry about.

DE-SCALE WITHOUT WORRY

- No salt to be added to the system
- No wasted water
- Prevents scale buildup
- No slippery feel left on skin
- De-scales existing buildup
- Virtually maintenance free
- No electricity required
- Adds nothing to the water, takes nothing away

Incoming Water Specifications

Operating Temperature	40 – 110 Deg. F
pH Range	6.5 – 8.5
Hardness	Up to 25 grains/gal.
Chlorine	< 3 ppm
Iron	< .2 ppm
Manganese	< .05 ppm
Copper	< 1.3 ppm
Hydrogen Sulfide	None allowed
Oil	None allowed
Phosphates	None allowed

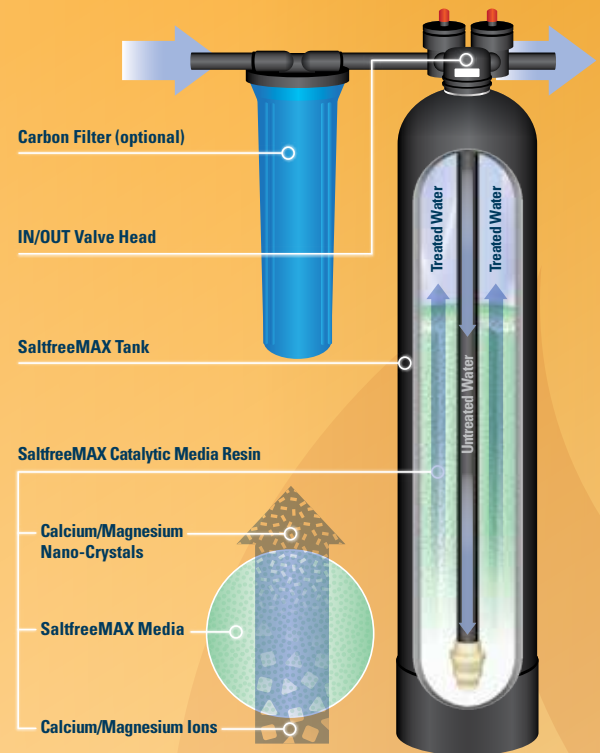

*Levels that exceed these parameters will foul the SaltfreeMAX™ media. Pretreatment may be needed to bring contaminant levels into compliance.

SYSTEM ADVANTAGES

- No moving parts, meters, or motors to wear out
- Simple test kit indicates whether system is functioning properly to prevent scale buildup
- Designed to work with high hardness levels up to 25 gpg (Higher rates available. Ask your dealer for more information)
- Simple installation with no electric programming needs
- Media and components certified to NSF/ANSI Standards 44 and/or 61"

HOW IT WORKS

- 1 Untreated water flows through an optional carbon pre-filter for improved taste, odor and chlorine removal, and protection of the SaltfreeMAX media.
- 2 Water flows down through tank center tube.
- 3 Water flows up through fluidized SaltfreeMAX media that causes calcium and magnesium (hardness ions) to form into nano-crystals.
- 4 Once bound in nano-crystals, these hardness minerals can't scale or attach to anything in the home.
- 5 Scale-free water enters your home, preserving fixtures and appliances, while also saving water and energy. The system uses no electricity, regeneration chemicals, or regeneration water.

Model*	Flow Rate (gpm)	Tank Size
SFM9	9	9 X 48
SFM10	12	10 X 54
SFM12	15	12 X 52

*For water with < 25 grains/gallon hardness. Systems available for water over 25 grain/gallon hardness.
